Do you have any problems with periods? Yes/No

If applicable at what age did you reach the menopause?

If you have answered YES to any of the questions on this form or have any other health problems, please give details below:

Osteopaths undergo a long period of training and are regulated by the General Osteopathic Council (www.osteopathy.org.uk). Training prepares osteopaths to examine and screen for potential difficulties that indicate where certain techniques should not be used, thereby avoiding patients being exposed to unnecessary risk.

Serious side effects are rare. The two most serious risks are:
1 - Stroke or artery damage caused to the arteries in the neck.
2 - Collapse of a spinal disc causing Cauda Equina Syndrome (damage to the bundle of nerves below the end of the spinal cord that can result in loss of bladder or bowel control)

I hereby confirm that the information given above is correct and undertake to notify **Julia Kinsey** of any changes in my medical condition as soon as I am aware of it. I understand that no personal information will be revealed (to my GP or other) without my written consent.
